

LD DE Series

Oil-Free Linear Diaphragm Pumps

LD50 DE
Single ended OEM model

LD60 DE, LD25 DE & LD20 DE
Single ended OEM model

Flow @
20 - 60 l/min
Vacuum
n/a
Pressure
0.3 bar

Contamination free pumping

The simple yet efficient pumping principle uses an electro magnetically operated diaphragm, which eliminates sliding parts keeping wear and tear minimal. This oil-free principle produces a smooth pulse free flow at a low pressure. LD DE pumps have two heads which can be used independently or connected together for increased performance.

Reliable, quiet and efficient

Designed for continuous duty the LD DE series is housed in a robust alloy casing with exceptional output from a small foot print. Efficient in operation the LD DE series offers low power consumption and life testing in excess of 14,000 hours.

OEM installion

Designed for easy OEM installation the LD DE series is lightweight and compact with quick fit anti vibration mounts requiring no tools. A range of models are available from 20 to 60 l/min. Products also carry CE Marking.

Application ideas

Application ideas include ripple beds, cuff inflation, physiotherapy, foot spa's, odour neutralisers, fuel cell manufacture and air sampling.

Please note that it is important that you ensure the motor specification stated and the range of materials offered in the pump are compatible with the performance, environmental limitations and chemical resistance of the application

For further information or details of our extensive range of diaphragm pumps, contact our technical sales who will be pleased to help you select the most suitable pump for your application.
